

GRANULAR NPK EQUATOR FERTILIZER

ORGOFERT™

GRANULAR FERTILIZER

ORGOFERT™

FACT SHEET

CROP MASTER™ SERIES

ORGOFERT® is organic approved granular fertilizer for soil application.

ORGOFERT® is approved as per organic standards as well as IFOAM accredited international organic standards and European organic standards EC834/2007.

ORGOFERT® is organic approved granular fertilizer for soil application with organic matter upto 80% and organic carbon more than 35%. **ORGOFERT®** get dispersed in the soil as it comes in contact with moisture and nutrients get release to soil. It contains chelated organic matter which delivers nutrients into the plant and soil. **ORGOFERT** also acts as an available food source for beneficial micro-organism's in the soil promoting sustainable, healthy living soil.

ORGOFERT® is a granular fertilizer that offers a well-defined grain size distribution nutrient content and good application properties. Besides the higher bulk density of granules needs a lower storage place and can also be stored and transported more economically.

Granular mixed fertilizers do not cake as much as powder mixed fertilizers and can cause less waste which minimizes production costs. Granular fertilizers slow releases the nutrient delivery to the plants until the granules disintegrate completely and thus ensure nutrients supply to the plant over a long period.

ORGOFERT® is the best choice to apply pre-plant as it slow releases nutrients to the plant for up to two months. **ORGOFERT** is most effective when applied on grain crops like Rice, corn, soybeans and also highly effective on all vegetables and fruits crops.

ORGOFERT™ Advantages:

- Improves the nutrient and micro-nutrients availability in the plant.
- Increase branches, flowering and fruiting.
- Regularize photosynthesis and nitrogen absorption.
- Converts maximum flowers in fruits.
- Improves plants SAR (systemic Acquired Resistance).
- Improves fruits size and texture.
- Improves fruit keeping quality and test.
- Increase harvesting period so more yield and weight.
- It can be applied mixed with foliar fertilizers, insecticides, fungicides and herbicides to use as foliar spray. Promotes the opening of the stomata on the leaves and ensures penetration of the foliar fertilizers and pesticides in to the plant.

APPLICATION RATE:

For grain crops, 25kg to 50Kg per acre as per soil requirements. For fruit crops approx 100KG. For vegetables 50Kg per acre and for fruit crops 50gm to 100gm per tree/plant. Can be applied at soil preparation time and at various development stages of plant and trees.
